

The more you awaken to your desire for truth and love of God in your life, the more you will automatically awaken to consciousness. Consciousness does not only mean conscious knowledge of the Divine; consciousness means you begin to live consciously and conscientiously. You become very thoughtful and mindful when in a God-conscious, aware state. You automatically care in a loving and devoted way to pay attention to all the details of your daily life and functioning. You do not negate your human existence and needs. You care very much. You tend to everything and every matter in a detailed fashion as if you were doing it for God, because you are! When you wake up to living in and for God, your intelligence becomes much more engaged in the details of daily matters. You act in a way that makes your life very simple and efficient.

God is extremely efficient and detailed. Living a God-conscious life, you yourself become highly efficient and detailed. Your lifestyle no longer has room for chaos, laziness, or lack of care and responsibility; quite the opposite. When this part of your consciousness begins to awaken truly, you will be aware of everything around you. You will simply not tolerate unconscious living in any area of your life at all. You will think and you will act in your life with care, efficiency, and responsibility. You resume your natural state of alertness in all ways as your consciousness comes out of its sleeping state.

You take care of your life because you want to. It is how you live in God consciousness. You live from a place of devotion in all your daily actions. There is no mess around you externally; and internally you begin to clean up that mess.

True awakened consciousness produces a high level of efficiency, order, love, and care from a natural place within yourself. It's not a manufactured technique that you learn. You wake up in your Being and you live from consciousness, and that manifests externally in your life in all areas. To be with God is to be awake and alert and in action in your life. You don't ignore the slightest detail. You pay attention and do the needful. Do you understand? Your car will be clean. Your drawers will be neat. Your desk will be organized, your bankbook balanced, your refrigerator clean, your clothes clean, your appearance nice. In this same fashion of external care and efficiency, your inner quest toward the Divine will be in devotion and care, and you will see to all internal spiritual matters with the same degree of excellence. You will care for your entire existence in God's love, and you will learn to care for others as God does.
